## **WARNING - Seizures**

- Some people (about 1 in 4000) may have seizures or blackouts triggered by light flashes or patterns, such as while watching TV or playing video games, even if they have never had a seizure before.
- Anyone who has had a seizure, loss of awareness, or other symptom linked to an epileptic condition should consult a doctor before playing a video game.
- Parents should watch when their children play video games. Stop playing and consult a doctor if you or your child have any of the following symptoms:

**Convulsions**  
**Altered vision**

**Eye or muscle twitching**  
**Involuntary movements**

**Loss of awareness**  
**Disorientation**

To reduce the likelihood of a seizure when playing video games:

1. Sit or stand as far from the screen as possible.
2. Play video games on the smallest available television screen.
3. Do not play if you are tired or need sleep.
4. Play in a well-lit room.
5. Take a 10 to 15 minute break every hour.

## **WARNING - Repetitive Motion Injuries and Eyestrain**

Playing video games can make your muscles, joints, skin or eyes hurt after a few hours. Follow these instructions to avoid problems such as tendinitis, carpal tunnel syndrome, skin irritation or eyestrain:

- Avoid excessive play. It is recommended that parents monitor their children for appropriate play.
- Take a 10 to 15 minute break every hour, even if you don't think you need it.
- If your hands, wrists or arms or eyes become tired or sore while playing, stop and rest them for several hours before playing again.
- If you continue to have sore hands, wrists or arms or eyes during or after play, stop playing and see a doctor.

## **WARNING - Battery Leakage**

Leakage of battery acid can cause personal injury as well as damage to your Game Boy. If battery leakage occurs, thoroughly wash the affected skin and clothes. Keep battery acid away from your eyes and mouth. Leaking batteries may make popping sounds.

To avoid battery leakage:

- Do not mix used and new batteries (replace all batteries at the same time).
- Do not mix alkaline and carbon zinc batteries.
- Do not mix different brands of batteries.
- Do not use nickel cadmium batteries.
- Do not leave used batteries in the Game Boy. When the batteries are losing their charge, the power light may become dim, the game sounds may become weak, or the display screen may be blank. When this happens, promptly replace all used batteries with new batteries.
- Do not leave batteries in the Game Boy or accessory for long periods of non-use.
- Do not leave the power switch on after the batteries have lost their charge. When you finish using the Game Boy, always slide the power switch OFF.
- Do not recharge the batteries.
- Do not put the batteries in backwards. Make sure that the positive (+) and negative (-) ends are facing in the correct directions. Insert the negative end first. When removing batteries, remove the positive end first.
- Do not dispose of batteries in a fire.

## BACKGROUND

Before they died, Richard Parker and Eddie Brock, Sr. were scientists working on a cancer curing experiment. They created a black liquid intended to bond with the human body and transform into a protoplasmic suit. It was intended to enhance the strength and abilities of the host and use the body's natural chemistry to heal.

They never got a chance to test their invention. They discovered the company they worked for had plans to use it as a weapon. Both Parker and Brock were morally opposed to the plan, so they destroyed their work and intended to start over. Unbeknownst to Parker, Brock kept a small sample of the black liquid, a sample that his son Eddie, Jr. found years later and showed to Peter Parker.

Believing he could finish his father's work, Peter broke into the laboratory where the sample was being stored and stole a small amount for his own experiments. Before too long, the suit began consuming Peter, forcing him to give it up.

When Eddie Brock, Jr. discovered what Peter had done, he was furious and took a sample of his own. He, too, was consumed by the suit, becoming the powerful and lethal Venom.

Soon after, Eddie tracked Peter to the high school, and a stormy confrontation ensued. When it was over, Peter believed Eddie was dead, even though his body had vanished. Now, three months later, Peter is haunted by nightmares of the suit eating him alive. He also feels he's being watched by someone or some *thing*.
