Fox Stands Alone...

In days gone by, the burning desire of Dr. Andross to rule the Lylat system filled the galaxy with the chaos of war. The mad ape sent out wave after wave of armies from his stronghold on the planet Venom, and used unique forms of radiation to create horrible monsters and terrible soldiers. His ambition swept this army across the galaxy to the planet Corneria.

It was there, however, that a quartet of mercenaries known as Star Fox put an end to the threat, and the leader of the team, Fox McCloud, defeated Andross in single combat.

In the years that followed, Venom was designated a forbidden planet and placed under the rigorous watch of Cornerian forces. All was going well until a mysterious army suddenly sprung forth from the toxic seas of the planet. Controlled by a mysterious leader called the Anglar Emperor, this new threat cuts through the Lylat system like a scythe through ripe wheat. The unexpected attack once again places the peoples, cities, and culture of the Lylat system in dire peril.

But much to the shock and dismay of the Lylat people, the members of Star Fox have gone their separate ways...leaving Fox McCloud as the lone obstacle in the Anglar army's path. Despite the odds, Fox heroically launches himself into the fray. But can he survive without the aid of his former teammates?

Single Player Rules

Each turn in single-player mode is made up of three phases. It's especially important to remember the particulars of the flight path phase.

About Turns and Phases

Turns proceed in the order shown to the right. Once all battles in the combat phase are complete, the turn is finished.

Flight Path Phase – Draw flight paths for all fighters on the mission.

Movement Phase – All allies and enemies move along their respective flight paths.

Combat Phase – All battles take place in whatever order you choose.

Flight Path Phase

In this part of the turn, you draw flight paths for all ships in the field. You can also view information on enemies and items on the map (p. 22), or fire missiles from the Great Fox. Additionally, you can display the pause menu (p. 13) by pressing the START Button.

How to Draw a Flight Path

Touch a ship, then slide the stylus in any direction to draw the flight path. The maximum length of the flight path is determined by how much fuel the ship in question possesses. If you wish to change a ship's flight path, simply touch it again and draw a new one. When you've finished drawing all of your flight paths, double-tap the Touch Screen to bring up the turn icon. Touch the icon to proceed to the movement phase.

Fuel Gauge

Shown during movement, this empties as the route grows longer.

Allied Base

Pass through these to replenish your fuel.

Firing Missiles from the Great Fox

To fire a missile, touch the Great Fox and then drag the missile onto an enemy. Missiles are extremely powerful but limited in number, so choose your targets wisely.

Movement Phase

During this phase, all of your fighters move simultaneously along their respective flight paths. Enemies and missiles also move during this phase. Any items contacted during the movement phase will become yours.

You can access the pause menu during the movement phase by pressing START.

The four types of enemies you can encounter are listed below. If you meet certain conditions while moving, you will engage these enemies in battle. Once in the combat phase, fight one battle at a time until all combat is complete.

	Enemy Fighter	If one of these enemies crosses a ship's flight path, combat will occur. The number of (icon) shows the number of enemies.
	Enemy Missile	Combat will begin if a fighter and a missile come into contact.
	Enemy Bases	If a fighter passes over one of these, it will stop and engage the enemy mothership protecting the base.

Combat Phase

If combat is initiated during the movement phase, the top and Touch Screens will switch. The Touch Screen will then display battle panels for all of the upcoming battles.

Battle Panels

The character engaging in battle is displayed in the upper right-hand corner of the panel. The number of cores needed to win (p. 21) is in the lower right-hand corner.

Touch a battle panel to begin that fight. Once one battle is finished, touch another panel to start that a new one. Continue this pattern until all battles are finished.

When panels are stacked on top of each other, you can select only the front panel.

When two characters are displayed on a panel, you can choose which character will fight.

Single Player Battles

During the combat phase, (p. 27) select battle panels to move to the combat screen (p. 27) and engage in battle.

Combat Rules

Before combat begins, the target enemy will be displayed. Pilot your fighter across the screen and destroy the target. Once you collect the set number of enemy cores (p. 21), the battle will be finished.

Pursuit Combat and Guide Beacons

The act of chasing down enemy motherships and missiles is known as pursuit combat. Follow the guide beacons to catch the target, then follow the on-screen instructions to destroy it. If you miss the guide beacons, the enemy will escape or you will be shot down!

Guide Beacon

Completing Battle

Once the fighting is over, the combat results screen will display. You'll receive a time bonus based on the number of enemies you shot down and then return to the battle panel screen. (p. 27)

The remaining time is the time left for all combat during the entire mission.

If you complete a battle with a perfect score, the Great Fox will receive a missile. (p. 25)

Penalties

If a fighter gets shot down or runs out of time, that pilot will lose the battle in which he or she is engaged, and the player's ship stock will be reduced by one ship.

Accordingly the remaining movement of the fighter that was defeated in battle will be cancelled, and the enemy that defeated the fighter will continue along its original flight path. If your fighter stock is zero and a character falls, you will no longer be able to use that character. If you run out of characters, the mission will end in failure.

Gaining Turns

Liberate an allied city and you'll get two turns (p. 22), lengthening the number of turns you have to complete the mission.

In this mode you can download the game from the host system and join a battle group. Once the host system has selected Cut Off, the download process will begin. After this and ship set up are complete, battle will commence.

Downloaded data will be lost when you turn your DS off.

Download Play Rules

Fly against other pilots on the combat screen. If you shoot down another ship, a star will appear. The player with the most stars at the end of the match is the winner. In addition, the following items will be available during versus play.

Star

	Plasma	Pick this up to transform your laser into a plasma shot.
	Twin	Snag this to equip a powerful twin laser.
	Stealth	Grab this to make yourself invisible to your opponents radar for a short time.
	Time Bomb	Snatch this versus-only bomb and let the countdown to destruction begin.

Important Wireless Communication Guidelines

- The DS Wireless icon  indicates compatibility with DS Wireless play. This icon appears on the DS menu screen, in-game menus, and other places. Selecting any menu items that have this icon will turn on the wireless communication system, so be aware of and comply with rules and regulations regarding the use of wireless devices in locations such as hospitals, airports, and aircraft, etc.
- During wireless game play, an icon  appears on-screen showing the strength of the wireless signal. The icon displays four levels of signal strength. The stronger the signal, the smoother game play will be.

Number of bars				
Signal Strength	Weak  Strong			

The power light blinks when the wireless function is working.

For optimum wireless communications, please follow these guidelines.

- Begin with the distance between systems at about 30 feet or less and move closer or farther apart as desired, keeping the signal strength at two or more bars for best results.
- The systems should face each other as directly as possible without having people or other obstructions between them.
- Avoid interference from other devices. If communication seems to be affected by other devices (wireless LAN, microwave ovens, cordless devices, computers), move to another location or turn off the interfering devices.

There can be up to four host system nicknames displaying at the same time on the guest system's bottom screen, but the exchanging of Friend Codes can only be done with one system at a time.

Nintendo Wi-Fi Connection

The Nintendo Wi-Fi Connection allows multiple Star Fox Command owners to play together over the internet—even when separated by long distances.

- To play Nintendo DS games over the internet, you must first set up the Nintendo Wi-Fi Connection (Nintendo WFC) on your Nintendo DS system. Please see the separate Nintendo Wi-Fi Connection instruction booklet included with this game for directions on setting up your Nintendo DS.
- To complete the Nintendo WFC setup, you will also need access to a PC that has a wireless network device installed (such as a wireless router) and an active broadband or DSL internet account.
- If you do not have a wireless network installed on your PC, you can order a Nintendo Wi-Fi USB Connector (sold separately) directly from Nintendo. See the separate Nintendo WFC instruction booklet for more information.
- Nintendo Wi-Fi Connection game play uses more battery power than other game play. You may prefer to use the AC Adapter to prevent running out of power when using the Nintendo WFC.
- You can also play Nintendo WFC compatible games at selected internet hotspots without additional setup.
- The Terms of Use Agreement which governs Nintendo Wi-Fi connection game play is available in the Nintendo Wi-Fi Connection instruction booklet or online at www.nintendowifi.com/terms.

For additional information on the Nintendo WFC, setting up your Nintendo DS, or a list of available internet hot spots, visit nintendowifi.com (USA, Canada, and Latin America) or call 1-800-895-1672 (USA/Canada only).

Rumble Pak™

This game is compatible with the Nintendo DS Rumble Pak (sold separately). The Rumble Pak includes built-in features that rumble while you play, providing realistic feedback. Please read the following before you play the game with Rumble Pak enabled.

- Make sure the Nintendo DS is turned off.
- Insert the Rumble Pak into Slot-2 on the front of the Nintendo DS (the label should face toward the bottom) just like loading a Game Boy Advance Game Pak.
- Make sure to turn the power off before removing the Rumble Pak.

Troubleshooting

- **Nintendo DS Rumble Pak is making a sound**
 - When the Rumble Feature is on, the Rumble Pak will make sounds during game play.
- **Does not rumble**
 - Make sure the Rumble Feature is turned on in the game (select Options in the main menu).
 - Make sure the edge connector of the Rumble Pak and the Nintendo DS system (Slot-2) are not dirty.
- **Does not stop rumbling**
 - Make sure the edge connector of the Rumble Pak and the Nintendo DS system (Slot-2) are not dirty.

If the Rumble Pak still does not work properly after following these troubleshooting measures, please call Nintendo customer service.

Voice Record

You can use your own voice to create unique voice data for individual characters in the game. Answer questions out loud when they appear on screen, then press [ICON]. When you've answered all of the questions, the data confirmation screen will be displayed. To make sure the voice is OK, tap the character for whom you want to use it and take a listen. If everything's all right, touch OK to finalize the voice.

Clear Data

This is where you can clear game data. Select Voice Data to clear voice data that you've recorded, or choose Single Data, which erases all single player data, or choose Wi-Fi Results, which erases all Wi-Fi results.
