Set up your 3DO Interactive Multiplayer System as described in the documentation that comes with the system. Turn on your television or monitor, then turn on the 3DO system. Insert the CD into the 3DO system disk tray and close it. Once the disk tray is closed, the software will start automatically.

levels

Although our unusual universe called *Digital Dreamware* is not comprised of levels, it does contain 6 different music video tracks. The order in which you discover them is up to you.

players

Digital Dreamware allows for 1 player at a time to control.

controls

There are only 2 controls; your joy pad and your mind. Don't be afraid to experiment with both. Your only limitation is your own inspiration. Experiment with your joy pad to manipulate the movement. Use the A & B buttons to alter your perception and speed. Experiment with your mind to manipulate the vision — and the adventure. The C button returns you to the menu.

to begin play

The floating cube in the center of your screen provides you with a sample of each video trip you may take. Control the cube movement with your joy pad. To make your selection, click (by pressing the "A" button) on a cube face and the appropriate title will appear in the title bar. Press the "A" button to start your selected track, the "B" button to view the instruction screen and the "C" button to view the credits.

to end play

Hit the C button at anytime during play to return to the MAIN MENU
