Game Screen

Bust Evasion

When you're aiming to become the Most Wanted racer, the heat is always on. Elude the cops with a suped up ride and a lot of fancy pedal work. But what happens if you can't shake a police pursuit? Here are some pointers.

- **Out-drive the cops**—It's a no-brainer, but it works. Drive faster and ride harder to keep the police constantly eating your exhaust.
- **Take a shortcut**—The police can't pursue you when they can't find you.
- **Ram the police car into traffic**—Can't shake your tail? Give him something bigger to worry about.

Doubling Down

If you win a Career race with a full Heat Meter, you may be offered the chance to double down. When doubling down, you are challenged to outrun the police. Win and you are awarded double the cash prize and bonus respect points. Fail to outrun the cops in the time allowed and you lose it all.

- When **DOUBLE DOWN** appears on-screen, select **YES** to begin the outrun challenge.

Note: Doubling down does not affect your career progression, accumulated cash, or current respect points earned before the race.

Saving and Loading

Note: Your progress is autosaved each time you win a race or apply upgrades to your car if you have the autosave featured enabled in your profile.

- To load a game you must first create a profile. After you create your profile, the game autoloads every time you start *Need for Speed™ Most Wanted 5-1-0*.
- For more information on profiles, see *Your Profile* on page 4.

Software titles that support Wi-Fi functionality allow you to communicate with other PSP systems and compete against other players via a connection to a wireless local area network (WLAN). You can adjust the network settings to allow connection to a wireless local area network (WLAN). There are two WLAN modes, Ad Hoc mode and Infrastructure mode.

Ad Hoc Mode

Ad Hoc mode is a Wi-Fi feature that allows two or more individual PSP systems to communicate directly with each other.

- To start a game in Ad Hoc mode, select AD HOC in the Multiplayer menu. The Ad Hoc screen—with its list of game names—appears. Select a game and press the **X** button.
- To create a new Ad Hoc game, select AD HOC in the Multiplayer menu, then press the **□** button. The Create Game screen appears. Specify game options, then select DONE. Your game is created. Each player selects READY. Once all of the players in the Ad Hoc screen that wish to play your game are ready, select START GAME. Each player selects a car and presses the **X** button. When all players have chosen their cars, the game starts.

Infrastructure Mode

Infrastructure mode is a Wi-Fi feature that allows the PSP system to link to a network via a WLAN access point (a device used to connect to a wireless network). In order to access Infrastructure mode features, several additional items are required, including a subscription to an Internet service provider, a network device, a WLAN access point, and a PC. For further information and set up details, please refer to the PSP system's Instruction Manual.

- To start a game in Infrastructure mode, select INFRASTRUCTURE in the Multiplayer menu. The EA Nation logo appears. Select a network connection or create a new one by selecting NEW CONNECTION and following the on-screen instructions. Create a new EA Online Account or use an existing Account, then select or create your Persona. The Infrastructure menu appears.
